## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 40,41,46,50,51,53 and 55-58 are rejected under 35 U.S.C. 102(b) as being anticipated by Mulhauser'572 et al.

The Mulhauser et al. reference discloses an inhaler device comprising “first and second components” (52,58), a medicament cartridge 10 with a plurality of compartments 16, a medicament extraction facilitating means (see col. 7, lines 12-26), and an operating means (54,60).

In regard to claim 41, see drive spring 76.

In regard to claim 51, see counting means (210,216) in figures 5 and 6.

In regard to claim 53, see mouthpiece 228 and cover 229.

In regard to claims 55 and 56, the compartments are pierced by a burst of high pressure air and the high pressure air is created by a reduced portion in a nozzle (proximate reference numeral 72 in Figure 3) which broadly defines a venturi structure.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The US 2002/032,409 and 6,116,238 references pertain to references cited during the prosecution of the associated PCT application.

Claims 21-39 are allowed.

Claims 42-45,47-49,52 and 54 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
